

The blaugelb Sliding Door Lever Handles HSG 1010 are available in various versions for interior and exterior use.

blaugelb Sliding Door Lever Handles HSG 1010 Black Line

Timeless design combined with high-grade stainless steel for wooden, plastic and aluminium window frames.

Product features:

The blaugelb Sliding Door Lever Handles HSG 1010 Black Line made from high-grade stainless steel are notable for their elegance and straight lines, and look good on every door. The straight lines of the 90° form emphasise the modern credentials of the handle series.

The blaugelb Sliding Door Lever Handles HSG 1010 Black Line are available in a variety of versions for interior and exterior use, and are also suitable for increased security aspects with the use of profile cylinders.

The substructure has a precision double detent mechanism and enhances the overall impression of high quality. The handles are supplied with the appropriate fastenings* for door thicknesses of 60 – 70 mm.

- High-grade materials for durability
- Lever mounted fixed/pivoting
- Attractive and elegant on window and balcony doors
- Concealed screws
