

The **blaugelb Universal Wood Screw, Flat Countersunk Head** for faster and more effective screwing.

blaugelb Universal Wood Screw PZ, Flat Countersunk Head

For ideal screwing indoors and in furniture construction.

Product features:

The blaugelb Universal Wood Screw PZ, Flat Countersunk Head is used for the fast and easy connection of wood and wood elements in interior work, furniture construction and wood construction. The flat countersunk head minimises the risk of injury by evenly countersinking into the material. Thanks to the powerful sliding coating, the screw connections can also be performed more quickly and stably.

The screw version with the PT also has milling ribs on the head and a cutting edge. The screw-in resistance is decreased by the cutting point, and splitting of the material is also prevented. The attached milling ribs render pre-countersinking unnecessary as the screw head mills into the wood itself.

Because of its characteristics, the full-thread version of the screw can also be used to fasten fitting components.

- ETA approval
- For universal application, as it is available with full and partial thread
- Partial thread version also equipped with milling ribs and cutting point

Universal Wood Screw PZ, Flat Countersunk Head
 For ideal screwing indoors and in furniture construction.

Technical data:

Material:	Steel
Surface:	Blue galvanized
Thread:	Single-start thread
Diameter:	3.0 / 3.5 / 4.0 / 4.5 / 5.0 / 6.0 mm
Diameter of head:	6.0 / 7.0 / 8.0 / 9.0 / 10.0 / 12.0
Drive:	PZ 1/2/3
Head shape:	Flat countersunk head
