

Ideal when out and about or for a quick fix.

## blaugelb Multi Care Spray

Multifunctional oil with broad range of applications.

- Just one product for many areas of application
- Effective protection against wear
- Permanently lubricates moving parts
- Acid-free, gentle on metal surfaces
- Anti-corrosive
- No gumming up thanks to high-grade additive
- Dissolves rust
- Suitable for O- and X-rings

### Product features:

The blaugelb Multi Care Spray is a multifunctional oil that combines the function of various separate oils – such as penetrating oil, contact spray, lubricating oil, corrosion protection, metal care agent, gun oil – in a single product. It is the ideal problem solver when out and about on the construction site or whenever a quick fix is needed.

The blaugelb Multi Care Spray provides reliable, lasting lubrication for parts that are exposed to impact, high pressure and vibrations. For all moving parts on metal rails and guides, joints, slide rails, chains, gear wheels, threads, construction machinery, couplings, sprockets, car doors and similar.

Do not use for lubricating door locks / lock barrels; we recommend blaugelb Hardware Spray for such tasks.

Spraying moving parts produces freedom of movement and a long-term reduction in wear. It does not attack paints and leaves behind a protective film. The adherent protective film, which repels water and dirt, protects against oxidation and wear.

### Product benefits:

- Just one product for many areas of application
- Effective protection against wear
- Permanently lubricates moving parts
- Acid-free, gentle on metal surfaces
- Anti-corrosive
- No gumming up thanks to high-grade additive
- No scouring of mechanical parts
- Seawater-resistant
- Dissolves rust
- Suitable for O- and X-rings
- Low consumption

### Technical data:

Material base:	Preparation of synthetic oils and additives in environmentally neutral propellant
Density at +20°C:	Approx. 0.62 g/cm <sup>3</sup>
Colour:	Colourless
Processing temperature:	Optimally from +5°C to +25°C

Product name	PU	Item no.
blaugelb Multi Care Spray 400 ml	12 cans	0301309

### Preparation and processing:

Shake the can before use. Spray directly onto the surfaces or parts to be treated. Alternatively rub the blaugelb Multi Care Spray onto the hardware with a cloth.

Operating the spray head 1 to 3 times will wet the moving parts sufficiently. When sprayed on, the blaugelb Multi Care Spray is a very thin liquid and has

good penetrating properties. This permits precise, optimum application. The solvent evaporates after spraying to leave the highly adhesive blaugelb Multi Care Spray at the desired points.

Only for commercial use. Carry out pretests for the effect and material compatibility.

### Cleaning:

Fresh excess spray can be removed again using universal thinner or cleaning solvent if the surface compatibility allows this. Carry out suitable pretests where applicable.

### Delivery and storage form:

Store in the original packaging in a dry place and protect against effects of frost and heat. Can be stored for 24 months at a storage temperature between +5 °C and +30°C.

### Disposal:

The disposal conforms with the national specifications.  
Waste key numbers: 160504 aerosol, 150104 metal packaging (empty cans)

### Safety note:

Please note the safety data sheets.
