blaugelb Window Maintenance Sets for wood/aluminium

The complete set for your wood/aluminium windows – including the respective setting tool.

Product features:

The **blaugelb Window Maintenance Set for wood/aluminium windows** contains the appropriate care and cleaning products that ensure that you can enjoy your windows for a long time. The suitable setting tool for adjustment of the fitting components is also included in the window maintenance sets for the specific manufacturers.

The set is available for the **following fittings**:

Product name	PU	Item no.
blaugelb Window Maintenance Set WOOD/ALU GU	1 set	9257988
blaugelb Window Maintenance Set WOOD/ALU MACO	1 set	9257986
blaugelb Window Maintenance Set WOOD/ALU ROTO	1 set	9257985
blaugelb Window Maintenance Set WOOD/ALU SIEGENIA	1 set	9257984
blaugelb Window Maintenance Set WOOD/ALU WINKHAUS	1 set	9257987
blaugelb Window Maintenance Set WOOD/ALU REFILL (without tools)	1 set	9306122

- One set for all applications
- Practical container sizes
- Application-specific products for longer service lives of your windows
- Including the suitable setting tools
- Appropriate refill set available for the containers

Detailed information on the containers
can be found on the following pages

blaugelb Aluminium Care Cleaner

Your helper from the blaugelb Window Maintenance Set for aluminium windows.

Product features:

The blaugelb Aluminium Care Cleaner is water-based and contains degreasing surfactants and preservative additives for effective but gentle cleaning of all types of aluminium surfaces. It is of no consequence here whether this is anodised, powder-coated, painted, or untreated aluminium, the blaugelb Aluminium Care Cleaner is prepared for every eventuality. It effortlessly removes rubber marks, rust stains, and lime and mortar residues as well as general soiling thoroughly and quickly without attacking the surface. And it manages all this without requiring subsequent wiping or rinsing with water.

The cleaner is therefore not only suitable for windows: doors, roller shutter curtains and tracks, and window breasts made of aluminium can also easily be cleaned with it.

Product benefits:

- Strong cleaning power, gentle on surfaces
- Suitable for all aluminium surfaces, even painted or anodised elements
- Subsequent wiping not necessary

Technical data:

Basis:	Water-based cleaner, prepared with surfactants, waxes, and levelling agents
Colour:	Light blue
Density:	1.0 g/cm ³
Minimum processing temperature:	5 °C
Shelf life:	24 months in unopened pack at +5 °C to +25 °C
Delivery form:	100 ml bottle

Application:

Due to the various materials and application conditions, we recommend performing your own tests before using the product for the first time.

Apply blaugelb Aluminium Care Cleaner to a soft, wet cloth and thoroughly scrub the dirty aluminium surfaces. Subsequent wiping not necessary. Do not rinse off with water.

Delivery and storage form:

Keep out of the reach of children. Store in the original packaging in a dry place and protect against effects of frost and heat. Can be stored for 24 months at a storage temperature between +5 °C and +25 °C.

Disposal:

The disposal conforms with the national specifications.
Waste code: 080409 (product), 150102 (packaging)

Safety note:

Please note the safety data sheet.

Product features:

Wooden windows provide a unique ambience and make a room feel cosy. To guarantee it stays this way, they need care and support.

blaugelb Wooden Cleaner takes on the cleaning of the window frames. It was specially developed for wooden surfaces and cleans them thoroughly and gently. The wooden surfaces are not attacked. It is also suitable for all wood types painted with non-water-based paints.

Product benefits:

- Strong cleaning power, gentle on surfaces
- Suitable for all wood surfaces, even painted elements

Technical data:

Cleaning components:	< 5 % non-ionic surfactants
Colour:	Light blue
Dynamic viscosity:	10 mPa*s
Minimum processing temperature:	5 °C
Shelf life:	24 months in unopened pack at +5 °C to +25 °C
Delivery form:	100 ml bottle

Application:

Due to processing and application conditions that are beyond our control as well as the number of different materials, we recommend carrying out sufficient tests yourself first in every case. Do not use on surfaces with water-based paints.

Apply blaugelb Wood Cleaner to a soft cloth and clean the wooden surface. Wipe off with a clean cloth and water.

Delivery and storage form:

Keep out of the reach of children. Store in the original packaging in a dry place and protect against effects of frost and heat. Can be stored for 24 months at a storage temperature between +5 °C and +25 °C.

Disposal:

The disposal conforms with the national specifications. Waste code: 080409 (product), 150102 (packaging)

Safety note:

Please note the safety data sheet.

Product features:

blaugelb Wood Balm is an effective care product that penetrates deep into wooden surfaces and is suitable for all painted and varnished wood types.

This balm rejuvenates and protects the surface by forming a water-repellent layer that increases the weather resistance. The deep action protects the surface against moisture and seals small hairline cracks in the paint so that moisture cannot penetrate it.

Also ideal for the regular care and improvement of your wooden furniture both indoors and outside.

Product benefits:

- Rejuvenates surfaces in no time at all
- Suitable for all wood surfaces, even painted elements

Technical data:

Colour:	Brownish
Dynamic viscosity:	10 mPa·s
Density:	1 g/cm ³
pH value:	7.5
Minimum processing temperature:	5 °C
Shelf life:	24 months in unopened pack at +5 °C to +25 °C
Delivery form:	100 ml bottle

Application:

Shake before use. Dab on the care product with the sponge applicator or with a soft, lint-free cloth. Do not rinse.

Delivery and storage form:

Keep out of the reach of children. Store in the original packaging in a dry place and protect against effects of frost and heat. Can be stored for 24 months at a storage temperature between +5 °C and +25 °C.

Disposal:

The disposal conforms with the national specifications. Waste code: 080409 (product), 150102 (packaging)

Safety note:

Please note the safety data sheets.

blaugelb Sealing Care

Your helper from the blaugelb Window Maintenance Set for tight windows.

Product features:

To ensure that windows and doors can continue to satisfy the requirements and keep out the cold, moisture, and noise, the individual components require the proper care. Our blaugelb Sealing Care helps you in the necessary care of window and door seals and makes sure that these remain functional for a long time. Thanks to its special formula, the blaugelb Sealing Care guarantees supple and moisture-repellent seals. This helps to prevent sticking in the summer and freezing to the profile in the winter, which guarantees durability.

Applications:

- blaugelb Sealing Care was developed for the maintenance and care of window rebate seals and other seals on windows and doors.
- It is used in window and door production as a pulling aid.

Product benefits:

- Keeps seals supple longer
- For longer reliability of the windows
- Subsequent wiping not necessary
- Quick and easy application

Technical data:

Basis:	Polydimethylsiloxane
Colour:	White
Density:	Approx. 1.0 g/cm ³
Flash point:	> 101.1 °C
Minimum processing temperature:	5 °C
Shelf life:	24 months in unopened pack at +5 °C to +25 °C
Delivery form:	50 ml bottle

Application:

Semi-annual care of the window seals is recommended.

Apply blaugelb Sealing Care to a soft cloth and rub into the seals. Subsequent wiping not necessary.

Delivery and storage form:

Keep out of the reach of children. Store in the original packaging in a dry place and protect against effects of frost and heat. Can be stored for 24 months at a storage temperature between +5 °C and +25 °C.

Disposal:

The disposal conforms with the national specifications.

Waste code: 080409 (product), 150102 (packaging)

Safety note:

Please note the safety data sheet.

Product features:

The blaugelb Hardware Spray is a special maintenance and care product for all moving fitting components and mechanisms on windows, doors, gates, and garages. It is used in the trades and in industrial plants in the production and maintenance of windows and doors – wherever mechanisms and fitting components are installed and need to be kept functioning properly in the long term. The blaugelb Hardware Spray provides effective protection against dirt and corrosion, extends the service life of the fitting components, and reduces the danger of consequential damage.

The blaugelb Hardware Spray can also be used in the sanitary sector, in lifts, in the automotive sector, and in many other areas.

Spraying moving parts produces freedom of movement and reduces wear thanks to cutting-edge additives. In just one step, the blaugelb Hardware Spray intensively maintains, protects, preserves, and seals the metal surfaces. It does not attack paints and leaves behind a permanently moist lubricant. The adherent protective film, which repels water and dirt, protects against oxidation and wear.

Product benefits:

- Provides effective protection against wear and soiling
- Frees seized mechanisms
- Does not attack paints and PMMA films
- Has an antistatic effect
- Free of resin and acid, gentle on metal surfaces
- Silicone-free
- Imparts lasting corrosion protection
- No scouring of mechanical parts
- Permanent effect thanks to strong adhesion
- Seawater-resistant

Technical data:

Material base:	Preparation of synthetic oils and additives in environmentally neutral propellant
Care components:	Special Mo ₂ additives
Density at +20 °C:	Approx. 0.605 g/cm ³
Colour:	Brownish
Processing temperature:	Optimally from +5 °C to +25 °C
Delivery form:	100 ml spray can

Application:

Shake the can before use. The moving fitting components are given a quick direct spray. Operating the spray head 1 to 3 times will wet the moving parts sufficiently. Spray on locally at close range and allow to act. Only for commercial use. Carry out pretests for the effect and material compatibility. For maintenance jobs, application every six months is recommended.

Fresh excess spray can be removed again using universal thinner or cleaning solvent if the surface compatibility allows this. Carry out suitable pretests where applicable.

Delivery and storage form:

Keep out of the reach of children. Store in the original packaging in a dry place and protect against effects of frost and heat. Can be stored for 24 months at a storage temperature between +5 °C and +30 °C.

Disposal:

The disposal conforms with the national specifications. Waste key numbers:
 160504 aerosol dispenser
 150104 metal packaging (empty cans)

Safety note:

Please note the safety data sheet.

Product features:

The blaugelb Lock Cylinder Spray is the universal care product for locks and lock cylinders with a special, non-greasing formulation. It protects against water, ice, corrosion, and wear. The blaugelb Lock Cylinder Spray is also suitable for other moving mechanical parts.

It is used in the trades and industry in the production and maintenance of locks and lock cylinders on doors and windows (e.g. with lockable window handles) – wherever durability and proper functioning are key. The blaugelb Lock Cylinder Spray provides effective protection against dirt and corrosion, reducing the danger of secondary damage.

Spraying moving parts produces freedom of movement and reduces wear thanks to cutting-edge additives. Squeaking and creaking are reduced. Corroded screw connections, pins, valves, flaps, or wheel studs can be released more easily.

The handy 50 ml spray can of the blaugelb Lock Cylinder Spray is the ideal companion for production and assembly tasks. With the nozzle extension, precision application is a straightforward affair. In winter, the blaugelb Lock Cylinder Spray keeps locks on exterior doors and car doors free from ice.

Product benefits:

- Provides effective protection against wear and soiling
- Does not bind dust
- Silicone-free
- Rapid creepage
- Imparts lasting corrosion protection
- Evaporating effect, can also be used as contact spray on electronic and electrical systems
- Free of PCBs, CCs, CFCs, chlorine, lead, and other pollutants

Technical data:

Material base:	Preparation of synthetic oils and additives in environmentally neutral propellant
Care components:	Special additives
Density at +20 °C:	Approx. 0.605 g/cm ³
Colour:	Colourless
Processing temperature:	Optimally from +5 °C to +25 °C
Delivery form:	50 ml spray can

Application:

Shake the can before use. Spray on precisely where needed with the special nozzle extension and wipe off any excess spray with a dry, absorbent cloth or cellulose. Carry out pretests for the effect and material compatibility.

Delivery and storage form:

Store in the original packaging in a dry place and protect against effects of frost and heat. Can be stored for 24 months at a storage temperature between +5 °C and +30 °C.

Disposal:

The disposal conforms with the national specifications. Waste key numbers:
160504 aerosol dispenser
150104 metal packaging (empty cans)

Safety note:

Please note the safety data sheet.
