

## blaugelb Profile Half Cylinder PHZ 1758 6S

The 6-pin profile half cylinder with locking cam adjustable to 12 positions and increased anti-intruder protection.

### Product features:

The blaugelb Profile Half Cylinders PHZ 1758 6S are made of nickel-plated brass and have a 6-pin normal profile with a paracentric key profile for individual locks. The cylinders are protected against mechanical attacks – they are ready with increased intrusion protection and bumping protection through a one-sided drilling and pull protection.

Thanks to their architecture and the confirmed testing properties, the blaugelb Profile Half Cylinders PHZ 1758 6S can be installed in an RC 1 N / RC 2 N / RC 2 / RC 3 system together with a Class ES 1 security plate without an additional cylinder cover. They are also an ideal choice for fire and smoke protection doors.

- 6-pin profile half cylinder with paracentric key profile for individual lock
- Suitable for fire/smoke protection doors
- Increased safety with drilling, pull and bumping protection
- Locking cam that can be adjusted to 12 positions
- Certified in accordance with DIN EN 1303:2015-08 and DIN 18252:2018-05

The blaugelb Profile Double Cylinders PHZ 1758 6S are tested in accordance with DIN EN 1303:2015-08 and DIN 18252:2018-05, and are supplied with three keys from the factory. These have an elongated key shaft that is optimised for use with pull protection rosettes without springs as well as a larger area that protrudes when the key is in the lock for more comfortable handling. For use with lifting/sliding doors, we offer a key version that is 4 mm shorter and can be ordered through our key service.

The blaugelb Profile Half Cylinders PHZ 1758 6S are individually keyed and are available in different installation lengths.

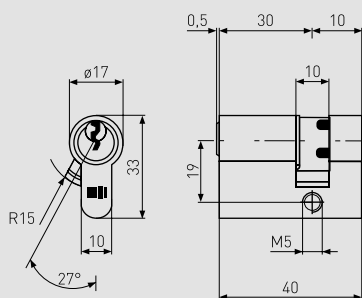

## Product benefits:

- 6-pin profile half cylinder with paracentric key profile for individual lock
- Suitable for fire and smoke protection doors
- Increased safety with drilling, pull and bumping protection
- Locking cam that can be adjusted to 12 positions
- Certified in accordance with DIN EN 1303:2015-08 and DIN 18252:2018-05
- 3 coded keys per cylinder
