

## blaugelb Service Profile Double Cylinder PDZ 1758

The 5-pin service profile double cylinder with increased anti-intruder protection.

- Service profile double cylinder for use with your own locking system
- 5-pin profile double cylinder with paracentric key profile for individual locks
- For increased intrusion protection – standard drilling and bumping protection

**Product features:**

The blaugelb Service Profile Double Cylinders PDZ 1758 are made of nickel-plated brass and are supplied with a dummy core without profiling. To convert it to your own locking system, the dummy core must be replaced with a profiled cylinder core that is appropriate for the system. Individual parts such as the core and key extension, the coupling, the locking cam and the pinning of the housing are already preassembled. Only the pinning of the core and the retaining clips must be added in this regard. The cylinders are protected against mechanical attacks – they are ready with increased intrusion protection through standard drilling and bumping protection.

This basic protection should always be supplemented with the assembly of a security plate in accordance with DIN 18257 of at least resistance class ES 1, e.g. with the blaugelb Lever or Knob Handle Set DGT or KGT PZ 92 with cylinder cover and resistance class ES 1.

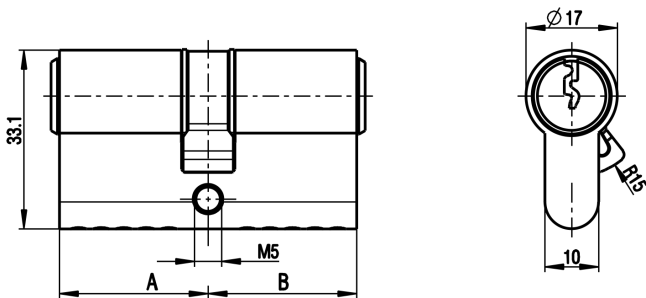

The blaugelb Service Profile Double Cylinders PDZ 1758 are available in different installation lengths.

**Product benefits:**

- Service profile double cylinder for use with your own locking system
- 5-pin profile double cylinder with paracentric key profile for individual locks
- For increased intrusion protection – standard drilling and bumping protection

**Technical data:**

Material:	brass, nickel-plated
Number of pins:	5 pins per side
Emergency function:	-
Classification code: <b>DIN EN 303:2005-04</b>	<b>1 6 0 1 0 C 4 0</b>
Number of keys:	-
Fixing screw:	M5 x 80 mm (included in scope of supply)
Packing unit:	1 cylinder, without key
