blaugelb Sliding Rosette PZ ZA oval BNM
Cylinder cover provides enhanced protection for external doors.

blaugelb

Product features:

Made of high-grade case-hardened stainless steel, the blaugelb Sliding Rosette PZ ZA oval BNM comes with an additional cylinder cover and has a surface anodised in a variety of shades or finished in fine matt. It is ideal as a reliable security rosette solution for external doors. The rosette can be adjusted so as to be flush with a cylinder protrusion from 11 to 14 mm. It is fixed in position by means of two countersunk head screws.

The recess on the rear level with the anchoring holes makes the blaugelb Sliding Rosette PZ ZA oval BNM also suitable for elements that use blind rivet nuts with an edge for fastening. This ensures 100% flush mounting.
