- **100 % material guarantee – stainless steel alloy 1.4301**
- **Robust, hard-wearing door handle design**
- **Absolutely safe and easy-to-assemble fixing system**
- **Universal fixing system for all front door types**

Product features:

This blaugelb Door Handle series offers a highly attractive flat front view entirely in keeping with current trends. Its clear lines lend every modern front door the ideal quality and fit seamlessly into the door design. Such a design feature raises this blaugelb Door Handle series well above the usual market standards that are frequently to be found in tubular handles.

When the blaugelb Door Handle 1/3 flat angle stilts 45° with milled dimples/ends polished was being developed, careful attention was paid to ensuring that the customary pleasant feel of tubular door handles was not neglected. Square door handles made of square or rectangular profile cross-sections usually feel rather hard to the touch, particularly at cold times of the year. The blaugelb Door Handle 1/3 flat angle stilts 45° with milled dimples/ends polished picks up this challenge, with the semicircular round rear side of its handle bar delivering the usual soft sensory experience when touched.

The deliberate contrast between the brushed middle section with the milled dimples and the brightly polished handle ends achieves a bicolour effect that further underlines the quality of this door handle series. The degree of gloss of the polish gives the door handle an utterly convincing mirror-like quality.

Each and every dimple is expertly milled in a CNC machining station using a specially developed tool. The greatest care was taken to ensure that the milled dimples run exactly in straight lines and are identical in size.

When combined with the safe and easy-to-assemble blaugelb fixing systems for different door types, blaugelb Door Handles are a reliable solution for the door.

blaugelb stainless steel door handles can be used without any problem on the following door types:

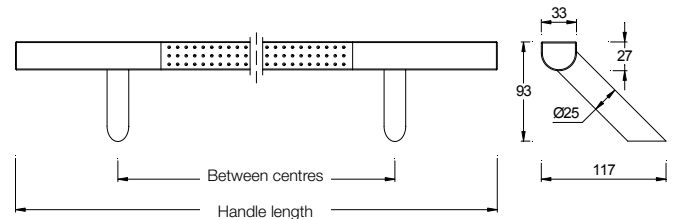

- On aluminium doors
- On plastic doors
- On wooden doors
