blaugelb Door Handle angle stilts 45° with grooves

Everything firmly in hand – stainless steel door handles from blaugelb.

Product features:

With rings machined by CNC and subsequently polished to a high gloss, the door handles of this series present an extremely elegant look. Every single ring is expertly crafted to the greatest precision on a CNC lathe. The utmost care is taken to ensure that the distance between the rings and the size of the rings match each other exactly.

The deliberate contrast between the brushed handle bar and the brightly polished rings achieves a bicolour effect that further underlines the quality of this door handle series. The degree of gloss of the polish gives the door handle an utterly convincing mirror-like quality.

The blaugelb Door Handle angle stilts 45° with grooves has also been designed in accordance with the strictest safety requirements and offers excellent resistance to signs of wear. When properly fitted on the front door or other door types, blaugelb Door handles angle stilts 45° with grooves show no signs of fatigue even after prolonged usage. No loosening of the base on the handle bar, no dangling from the door – these are crystal-clear arguments for this blaugelb Door Handle series also.

When combined with the safe and easy-to-assemble blaugelb fixing systems for different door types, blaugelb Door Handles are a reliable solution for the door.

blaugelb stainless steel door handles can be used without any problem on the following door types:

- On aluminium doors
- On plastic doors
- On wooden doors
