- **Universal fixing system for all front door types**

Product features:

The blaugelb Door Handle in semicircle form is a traditional design that has stood the test of time. Made of a high-grade stainless steel tube, the blaugelb Door Handle semicircle form is manufactured in the alloy 1.4301. Specially developed tools and devices are used to form the tube into the classically appealing semicircular design that is so beloved in the property sector.

The generous curves produced in the bending process interplay with the very finely brushed surface to make this blaugelb Door Handle in semicircle form thoroughly pleasant to the touch.

The blaugelb Door Handle semicircle form has also been designed in accordance with the strictest safety requirements and offers excellent resistance to signs of wear. When properly fitted on the front door or other door types, blaugelb Door handles semicircle form show no signs of fatigue even after prolonged usage. No loosening of the base on the handle bar, no dangling from the door – these are crystal-clear arguments for blaugelb door handles.

When combined with the safe and easy-to-assemble blaugelb fixing systems for different door types, blaugelb door handles are a reliable solution for the door.

blaugelb stainless steel door handles can be used without any problem on the following door types:

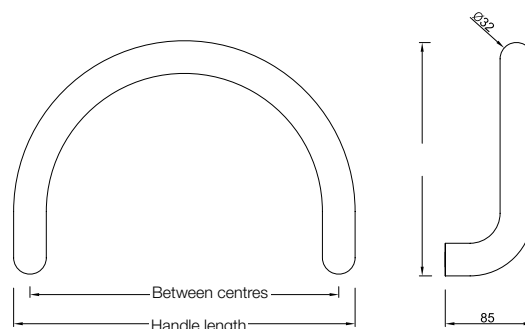

- On aluminium doors
- On plastic doors
- On wooden doors
