

The **blaugelb grinding pads** for demanding grinding jobs, particularly on curves and contours.

blaugelb grinding pads

The solution for a simple, perfect ground finish.

- Perfect surfaces thanks to pressure-distributing foam
- Little risk of "grinding through" the workpiece due to excessive pressure
- Extremely high adjustability to curves, contours and profiles
- Hardly any glazing thanks to the special properties from the direct coating of the foam
- Waterproof, removable by washing and suitable for use in wet and dry grinding

Product features:

Made of soft PU foam and with a silicon carbide grain, blaugelb grinding pads are suitable for grinding wood, paint, varnish, filler, stopper, plastic, GRP, composites, and rubber in wet and dry grinding. Thanks to the direct coating of the soft pressure-distributing foam on 2 sides, blaugelb grinding pads are ideal for the universal processing of curves, edges, recesses, radii and surfaces in both wet and dry grinding – for a simple yet perfect ground finish.

The blaugelb grinding pads are suitable for:

- **smooth grinding** after or before painting or soaking
- **initial grinding** of wood, paint, varnish, filler, GRP and composites
- **intermediate grinding** of varnishes and coats of paint
- **grinding** curves, profile rods, flat spots and contours
- **fine grinding** at all difficult places

Product benefits:

- Perfect surfaces thanks to pressure-distributing foam
- Little risk of "grinding through" the workpiece due to excessive pressure
- Extremely high adjustability to curves, contours and profiles
- Hardly any glazing thanks to the special properties from the direct coating of the foam
- Waterproof, removable by washing and suitable for use in wet and dry grinding

Technical data:

Substrate material:	PU foam (polyurethane)
Grain material:	Silicon carbide
Foam hardness:	Soft
Bonding:	Elastic synthetic resin
Coating:	2-sided
Dimensions:	123 x 98 x 12 mm
Colour:	Black

Product name	PU	Item no.
blaugelb grinding pad medium K60/P150	250 pieces	0422382
blaugelb grinding pad fine K100/P220	250 pieces	0407990
blaugelb grinding pad very fine K180/P320	250 pieces	0409459

Note:

The use of foam as the carrier material means that the scattered grain and the ground appearance achieved will differ.

We therefore indicate: grain = scattered grain and ground appearance corresponds roughly to the result achieved with sandpaper (e.g. grain 100 =

approx. P 220). Please try out for yourself. Grain pull-out, albeit slight, is normal. Workpieces must be cleaned after processing.
