

blaugelb grinding sponges hard foam for straight, fine grinding - robust and long-lasting.

blaugelb grinding sponges hard foam

The robust solution for difficult grinding spots.

- Very robust and aggressive due to solid foam body
- Perfect surfaces thanks to pressure-distributing foam
- Less risk of “grinding through” the workpiece due to excessive pressure
- Particularly suitable for grinding folds and surfaces
- Hardly any glazing thanks to the special properties from the direct coating of the foam
- Waterproof, removable by washing and suitable for use in wet and dry grinding

Product features:

Made of hard PU foam and with an aluminium oxide grain, blaugelb grinding sponges hard foam are suitable for grinding wood, paint, varnish, filler, stopper, plastic, composites, leather, metal and textiles in wet and dry grinding. Thanks to the direct coating of the hard pressure-distributing foam on 4 sides, blaugelb grinding sponges hard foam are ideal for the processing of folds, edges and surfaces for straight, fine grinding.

The blaugelb grinding sponges are suitable for:

- **fine grinding** wood, metal, composites and varnish
- **initial grinding** of wood, paint, varnish, filler, metal, textiles, GRP and composites
- **fine and intermediate grinding** of paints, varnishes, coatings and fillers
- **grinding** surfaces, folds and edges

Product benefits:

- Very robust and aggressive due to solid foam body
- Perfect surfaces thanks to pressure-distributing foam
- Less risk of "grinding through" the workpiece due to excessive pressure
- Particularly suitable for grinding folds and surfaces
- Hardly any glazing thanks to the special properties from the direct coating of the foam
- Waterproof, removable by washing and suitable for use in wet and dry grinding

Technical data:

Substrate material:	PU foam (polyurethane)
Grain material:	Aluminium oxide (Al ₂ O ₃)
Foam hardness:	Solid
Bonding:	Elastic synthetic resin
Coating:	4-sided
Dimensions:	98 x 69 x 26 mm
Colour:	Black brown

Article dimensions	PU	Item no.
blaugelb grinding sponge hard foam medium K60/P150	250 pieces	0422379
blaugelb grinding sponge hard foam fine K100/P220	250 pieces	0422380
blaugelb grinding sponge hard foam very fine K180/P320	250 pieces	0422381

Note:

The use of foam as the carrier material means that the scattered grain and the ground appearance achieved will differ. We therefore indicate: grain = scattered grain and ground appearance corresponds roughly to the result

achieved with sandpaper (e.g. grain 100 = approx. P 220). Please try out for yourself. Grain pull-out, albeit slight, is normal. Workpieces must be cleaned after processing.
